

To whom it may concern...

The Communications Industry, because of its usefulness to Government, Finance, Intelligence gathering and Warfare, is really in the position where it is spiralling out of any person's ability to control it, with regard to advancing technology.

Initially, all systems "pulsed". However, when it was realised that stealth microwave warfare relies on entrainment of a brain from such pulses, now being used as a domestic instrument, the pulses had to be re-named as "modulations". The difference between them is infinitesimally small, but the effect is just the same. Only the name has changed.

I believe that this explains the dramatic changes in behaviour we are now witnessing - group suicides, disruption in schools, aggression and so on.

Over the years, I have compiled a list of known entrainment responses (followed by long-term ostentation) from these microwaves. It should be appreciated that each person will respond slightly differently, although the same area of brain/temporal/amygdaloid temporal/parotid/etc., will remain the same.

Pulses/Modulations

Per second/

Possible Result

- 1 Heartbeat Rhythm
- 1-3 Sleep Pattern
- 3-5 Paranoia/Hallucinations/Amnesia/Illusions/Drowsiness 'Absent' Feeling
- 6-7 Depression/Suicidal Feelings/Visual Distortion/Confusion
- 8-11 Cannot Relax/Feeling Unwell/Unhappy
- 11-13 Anger/Manic Behaviour/Problems with Movement/Flashes/Loss of Appetite
- 14-18 Small Seizures/Disturbed Orientation/Auditory/Visual Hallucinations
- 18+ Inability to make decisions/Sensory problems (sight/touch/sound)
- 24+** Confusion/Flickering/flashing lights/Dizziness
- 35+ Mania/Hyperactivity

- 40+ Anxiety/Sleep disturbance/Reaction time slowed/Unable to make decisions

** It is worth mentioning that a mobile phone with a pulse/modulation frequency of 25 could act directly on visual sight (if being held at head), or heartbeat (if in a chest pocket). A frequency of 25 can disrupt both visual and heart neurotransmitters.

Clearly a susceptible person may have any combination of these. Electrosensitive persons may recognise many of their own symptoms. My work on electrosensitivity and the brain can be found on www.mastsanity.org <<http://www.blogger.com/>> .

I think the problem is that young Governments and young communications engineers have no knowledge of Cold War warfare and don't know who to ask; even if they did, the Government would probably be in denial. The situation is a mess, made worse by greed.

If anyone would like clarification of any of the foregoing, or I can help in any way, please let me know.
